Case No.: AUS920010194US1 (9000/35)

Serial No.: 09/821,109

Filed: March 29, 2001

Page 2 of 11

SPECIFICATION AMENDMENTS:

Please amend the paragraph beginning at page 4, line 1 as follows:

“Turning now to the drawings, and in particular to FIG.1, ~~these~~ there is illustrated a block diagram of an exemplary system 10 in accordance with the present invention. The system 10 can be any suitable computing device, such as a commercially-available workstation or server running a conventional operating system, having a processor 12, such as a microprocessor, for executing software programs and a memory 14 for storing the software program and data usable by the processor 12.”

Please amend the paragraph beginning at page 9, line 4 as follows:

“FIG. 3 shows a flow chart 50 describing the operation of the wrapper 16. The wrapper implementation 16 implements both the collection and enumeration APIs. When the wrapper 16 receives a call on the enumeration API (step 54), it delegates directly to the existing enumeration implementation class instance (~~step 54~~) (step 56). In the enumeration interface methods, the implementation 16 delegates to the original implementation.”
